

NAME: _____

MORE, LESS THE SAME!

calvin and hobbes

DIRECTIONS:

- 💡 The shape on the next page is called a rectilinear shape. A rectilinear shape is a polygon that has all sides meeting at right angles. You are to design a rectilinear shape that fits the given perimeter and area constraints for each cell in the matrix.
- 💡 You cannot design a shape that is not rectilinear, so no curves or angles other than 90° .
- 💡 Be creative and have fun!
