

# Negative Number Game

-1	4	-7
-9	3	-5
-5	-6	2

9	25	35	30	-15	-20
5	-10	30	42	6	-18
-4	12	-12	-10	-15	45
-3	-24	35	-14	-21	63
6	-28	-20	8	-18	54
7	5	-2	45	-36	-27

## Game For 2 Players

**Player 1** Choose two numbers from the smaller grid and multiply them together in your head. Can you find the answer on the larger grid? Point it out to player 2.

**Player 2** Check, using the calculator, that player 1 has calculated correctly. If they have then they colour that square with their colour. If they haven't calculated correctly then you colour the square with the correct answer in it with your colour.

Then swap roles! And continue until one person gets four colours in a line. That person is then the winner!!
